SUBJECTS

ABDOMEN

antibiotic therapy in abdominal trauma 32(3):14, 1988 oa

endometriosis of the rectus abdominis muscle 32(6):91, 1988 oarc

gut neoplastic diathesis associated with carcinoid tumors: report of patient with five histologically distinct gut neoplasms 32(1):99, 1988 oa

infected abdominal aortic aneurysm following transfemoral arteriography: case report 32(5):37, 1988 oa

'shoelace' repair of large postoperative ventral abdominal hernias: a simple extraperitoneal technique 32(1):24, 1988 oa

spigelian hernia containing an undescended testicle 32(2):22, 1988 oa

torsion of an ectopic pelvic spleen 32(4):73, 1988 oarc

ANEURYSMS

infected abdominal aortic aneurysm following transfemoral arteriography: case report 32(5):37, 1988 oa

BLOOD

accessory splenectomy in management of idiopathic thrombocytopenic purpura 32(2):73, 1988 oa

BREAST

angiosarcoma of the breast: a case report and review 32(6):96, 1988 oarc

conservative surgery in breast cancer 32(4):58, 1988 oa

evaluation of mammography by the practitioner 32(6):74, 1988 oa

fibrocystic 'disease' of the breast: what's in a name? 32(2):43, 1988 oa

CANCER

angiosarcoma of the breast: a case report and review 32(6):96, 1988 oarc

changing patterns in the management of head and neck cancer 32(5):97, 1988 s

conservative surgery in breast cancer 32(4):58, 1988 oa

controversies in the treatment of malignant melanoma 32(2):99, 1988 s

cystadenocarcinoma presenting as a pseudocyst of the pancreas 32(5):21, 1988 oa

diagnosis and preoperative management of colorectal carcinoma 32(1):39, 1988 oa

diagnosis of pancreatic cancer 32(3):75, 1988 oarc

fibrolamellar carcinoma of the liver presenting with hemobilia 32(6):26, 1988 oa

a giant basal cell carcinoma with lymph node metastases: case report and review of the literature 32(4):33, 1988 oa

postnephrectomy arteriovenous fistula: case report with contralateral renal cell carcinoma and review of the literature 32(5):85, 1988 oarc

primary adenocarcinoma of the small intestine 32(5):52, 1988 oa

the proper operation for papillary cancer of the thyroid 32(1):107, 1988 s

COLON/RECTUM

colovesicle fistula: a comparison of the morbidity associated with staged surgical procedures 32(2):28, 1988 oa

diagnosis and preoperative management of colorectal carcinoma 32(1):39, 1988 oa

pyoderma gangrenosum and ulcerative colitis: case report and review 32(4):91, 1988 oarc

GALLBLADDER

agenesis of the gallbladder 32(4):39, 1988 oa

vesica fellea duplex 32(5):65, 1988 oarc

GASTROINTESTINAL TRACT

Bouveret's syndrome: an unusual cause of gastric outlet obstruction 32(3):64, 1988 oa

Brunner's gland hamartoma of the duodenum 32(4):53, 1988 oa

effects of esophagogastric decompression on postoperative gut function 32(3):52, 1988 oa

gastric hemangioma 32(2):85, 1988 oarc

intraluminal duodenal diverticulum 32(4):83, 1988 oarc

proximal gastric vagotomy for duodenal ulcer: 7-15-year follow-up 32(4):17, 1988 oa

use and complications of staplers in gastrointestinal surgery 32(1):88, 1988 oa

HEART

blunt cardiac valve trauma: report of an unusual case and review of the literature 32(2):93, 1988 oarc

coronary artery fistula as a cause of myocardial ischemia 32(5):73, 1988 oarc

primary pericardial spindle cell thymoma: embryology and treatment 32(3):38, 1988 oa

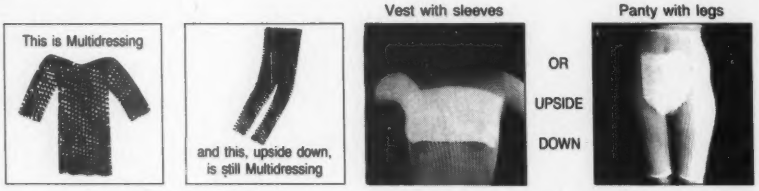
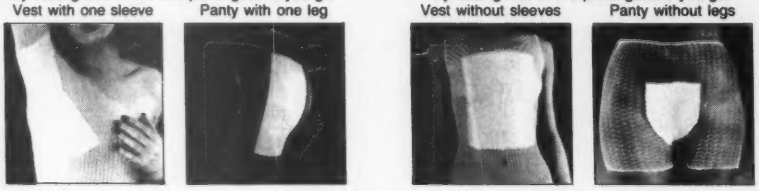
MULTIDRESSING MULTIROLE DRESSING IN UNIVERSAL SIZE

When you take MULTIDRESSING out of the package, you get:



By cutting one of the two prolongations you get
Vest with one sleeve Panty with one leg

By cutting half of the prolongations you get
Vest without sleeves Panty without legs



MULTIDRESSING is a multirole poliextensible net stretch dressing that allows the possibility of eight different applications. Its universal size fits all, patients with bulky medications and up to 250 lbs., too. Its high versatility allows a remarkable simplification of inventory while offering the functional advantages of precut tubular net stretch dressings. MULTIDRESSING does not require personnel tailoring, "artwork" cutting or other preparations. It molds to any part of the body, stretches in all directions, does not hinder perspiration, allows change or inspection of the medication simply by lifting one edge. Always returns in shape and stays in place allowing the patient freedom of movement. Owing to the differentiated textile construction on each part of the dressing. MULTIDRESSING gives the same pressure on body and limbs. MULTIDRESSING saves Nurse's time and allows a quick cost itemization. (US Patents; No. 3,279,465 & 3,307,546)
